RxOffice's EMR Achieves ONC HIT 2014 Edition EHR Certification from ICSA Labs

COLUMBIA, MD., May 12, 2015 – [RxOffice](#) Inc.'s, RxOffice EMR Version 1.0 has achieved ONC HIT 2014 Edition complete EHR certification, which designates that the software is capable of supporting eligible providers with meeting the Stage 1 and Stage 2 Meaningful Use measures required to qualify for funding under the American Recovery and Reinvestment Act (ARRA). RxOffice EHR was certified on April 30, 2015 by [ICSA Labs](#), an Office of the National Coordinator-Authorized Certification Body (ONC-ACB) and is compliant in accordance with applicable criteria adopted by the Secretary of Health and Human Services (HHS).

"We believe this certification will help our customers demonstrate Meaningful Use preparedness," said Sanjeev Dahiwadkar, CEO and president of RxOffice. "As healthcare providers use more technology, systems must help them remain compliant as well as more efficiently serve their patients."

ICSA Labs, an independent division of Verizon, offers vendor-neutral testing and certification. ONC HIT 2014 Edition Certification is granted to those technologies that are capable of meeting the more rigorous testing criteria developed to support providers and hospitals who wish to demonstrate Stage 2 meaningful use, which focuses on the capability of health IT to deliver higher quality patient care and exchange clinical information securely.

RxOffice EMR Version 1.0's certification number is 150053R00. ONC HIT certification conferred by ICSA Labs does not represent an endorsement of the certified EHR technology by the U.S. Department of Health and Human Services.

The clinical quality measures to which RxOffice EMR Version 1.0 has been certified include CMS#68V4, CMS#117v3, CMS#122v3, CMS#127v3, CMS#138v3, CMS#147v4, CMS#154v3, CMS#155v3, CMS#163v3, CMS#165v3 and CMS#182v4.

The additional software relied upon to comply with one or more of the certification criteria include DrFirst Rcopia, MedilinePlus connect, EMR Direct PhiMail Server and Microsoft Healthvault.

About RxOffice

RxOffice, a global provider of software consultation, design and development services, provides technology to health care organizations professionals around the world. RxOffice's solutions deliver the tools they need to offer excellent patient care while remaining compliant with privacy regulations and other requirements.

For more information about RxOffice, visit www.rxoffice.us.

About ONC Certification

The ONC Certified Health Information Technology (HIT) program tests and certifies that HIT is capable of meeting the 2014 Edition criteria approved by the Secretary of Health and Human Services (HHS). The certifications include Complete EHRs, which meet all of the 2014 Edition criteria for either eligible provider or hospital technology and EHR Modules, which meet one or more — but not all — of the criteria.

About ICSA Labs

ICSA Labs, an independent division of Verizon, offers third-party testing and certification of security and health IT products, as well as network-connected devices, to measure product compliance, reliability and performance for many of the world's top security vendors. ICSA Labs is an ISO/IEC 17025:2005 accredited and 9001:2008 registered organization. ICSA Labs is NVLAP accredited as a Health IT Test Lab and is also an ONC-Authorized Certification Body (ONC-ACB) accredited by ANSI to ISO/IEC Guide 65.
